**- SEE OFFICE ACTION ON THE FOLLOWING PAGES -**

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-38, drawn to a method of treating a flue gas containing dust to remove at least a portion of the dust from the flue gas, classified in Class 423, subclass 215.5.

II. Claims 39-41, drawn to a method of treating a flue gas containing a dust or a pollutant, classified in Class 423, subclass 210.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together, or they have different modes of operation, or they have different functions, or they have different effects. (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated since the Group I claims require the steps of sensibly cooling the flue gas and removing at least a portion of the dust from the flue gas by electrostatic precipitation, which are not required by the claims of the Group II invention, and the claims of the Group II invention require a series of steps including the step of reacting at least a portion of the flue gas with an alkaline material, which steps are not required by the Group I claims.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, and vice versa, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
